

scoreline

A football app for match nights.
Three bars cut from five spectra, set
in Hanken Grotesk.

Three bars on a 12-unit grid.

Each bar is 3 units wide. The sides are 6 tall, the middle 11. The left bar drops 3 units, the right one 2, so the mark never sits level.

CONSTRUCTION

1 unit = 12 · the mark is 9 × 11

CLEAR SPACE

One bar width on every side.

Nothing enters the 3-unit border around the mark: no text, no edge, no other logo.

BARS

Left Dusk, middle Violet, right Floodlight.

The order never changes. Each bar keeps its own spectrum, top to bottom.

MINIMUM SIZE

16 px tall on screen, 6 mm in print.

02 / Lockup

The mark leads, the name follows.

One horizontal lockup. The wordmark is Hanken Grotesk Medium in lowercase, outlined. The left bar sits on its baseline.

PRIMARY · ON NIGHT

ONE COLOR · ON THE FIELD

ONE COLOR · CHALK ON SURFACE

SPACING

Gap between mark and name: 1⅔ bar widths.

Clear space is one bar width, the same as the mark on its own.

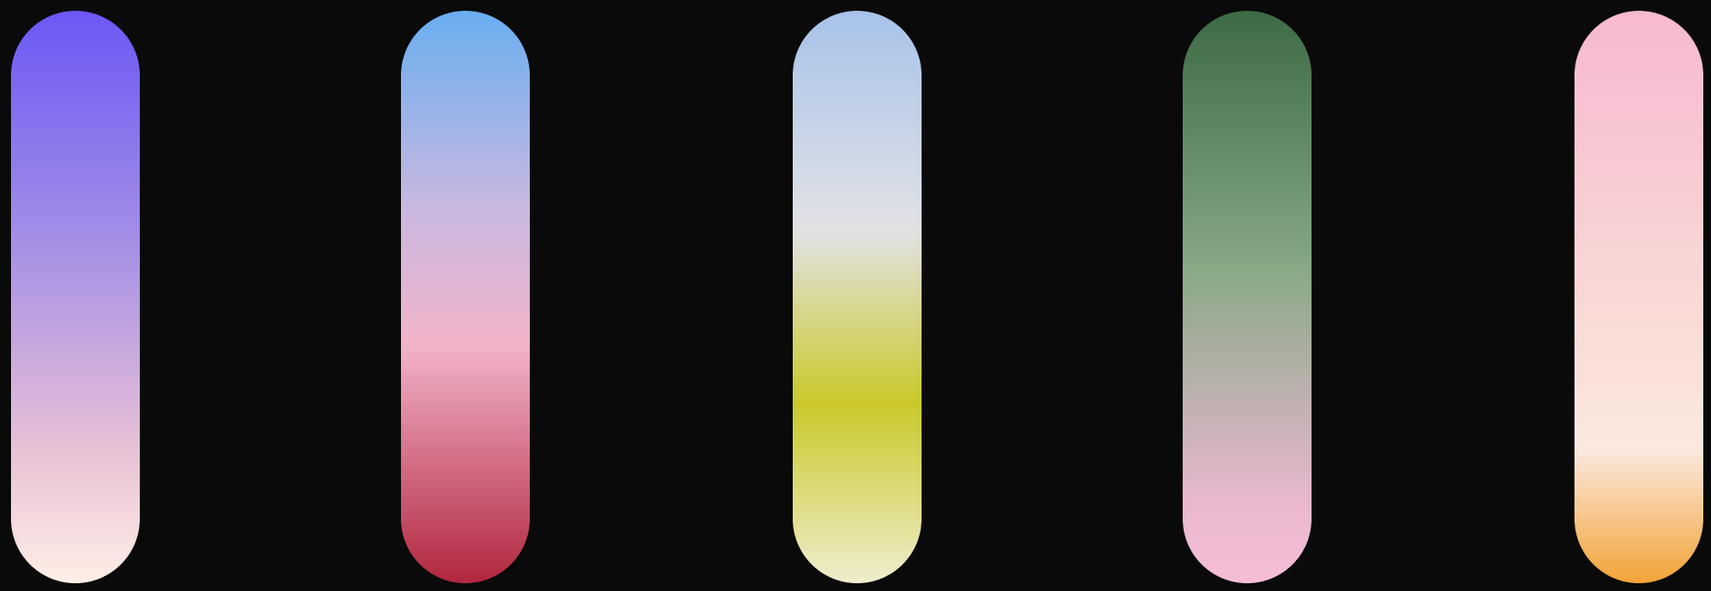

ONE COLOR

When the ground fights the spectra, fade.

On the field gradient or in a single ink, each bar fades in one color: sides fade up, the middle fades down.

Five spectra on a night ground.

The app lives at night. Black carries the screen, chalk carries the text, and the spectra arrive only where something matters. Names are taken from the pitch.

Violet

The lead. The middle bar, the call to action.

Hanken Grotesk, Medium.

One family. Medium for names, scores and titles, Regular for running text. Numbers are always tabular, so a score never jumps when it changes.

05 / Motion

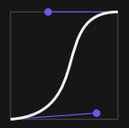

The mark moves like a score changing.

Sides go up and come back from below, the middle goes down and comes back from above. Two moves, nothing else.

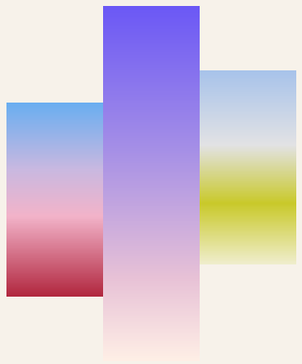

Roll

The color rolls inside each bar. For loading and for moments inside the app.

```
cubic-bezier(.802, .057, .35, 1) · 800ms · M 0 / L 160 / R 160 · hold 500
```

Copy

Lift

The bars travel inside the mark, left to right. This is the header of the case study.

```
cubic-bezier(.65, 0, .35, 1) · 800ms · L 0 / M 180 / R 440 · hold 1000
```

CALL TO ACTION

Six things the mark never does.

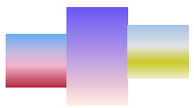

Don’t rotate it.

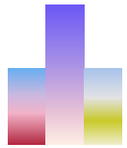

Don’t change the bar order.

Don’t flatten the spectra.

Don’t stretch it.

Don’t level the bars.

Don’t put full color on the field.

Everything, in one folder.

One zip with the vectors, the exports, the tokens for code and this book as a PDF. File names say what is inside.
